

Airplac[®]PRINTFOAM - Safe and economical !

Are your customers highly aware of the new “Hygiene” regulations? We bet they are !

- Airplac[®]PRINTFOAM is a panel made 100% of polystyrene.
- The printed panel can be cleaned with a soapy sponge or most of the hydro-alcoholic sanitiser solutions that are on the market.
- Suitable for temporary POS, Hanging Signs, Event decors, Shop windows. Can be inserted in all-weather frames for outdoor use.
- It is 100% recyclable and can be included in the plastic sorting schemes used by all reputable supermarkets for recycling
- Available in 10mm thickness and all sizes up to 1524x3050mm.
- The panel can be printed on both sides. One side is smooth for economical printing. The other side is grainy and gives a natural print result.
- Airplac[®]PRINTFOAM can be cut with laser cutters or digital cutters.
- Special cutting techniques like Kiss-cuts are possible to extend the POS possibilities of the panel.
