# Airplac®
FOAM BOARD

3 photo frames

A **B** **C**
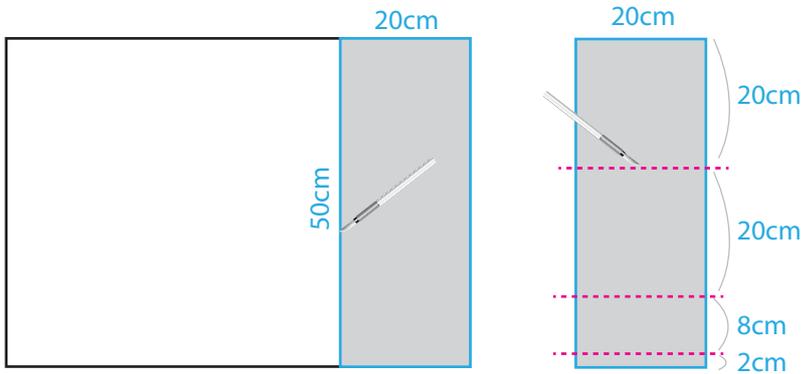

Difficulty : ★★
Time :
30 minutes

What you need :
☐ 1 x Airplac®PREMIER foamboard 50x70cm, 5mm
or 1 x Airplac®CREATIVE funboard.
With 1 panel you can make the 3 frames shown.
☐ Double-sided Sellotape, double-sided Velcro. Cutter.

—— Clean cut
······ Kiss-Cut

① Firstly you will make the base for Frame A.

20cm

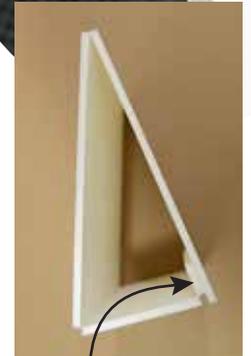

20cm

20cm

8cm
2cm

Kiss-cut :

Cut through the surface layer and foam but stop just before cutting through the underneath surface layer. Then fold the panel along the cut-out hinge.

Fold the strip along the kiss-cuts.

Cut a strip 20cm wide and 50cm long out of the panel.

On the strip, indent the panel with 3 kiss-cuts as shown in the illustration.

Place a small piece of double- sided Sellotape on the outside of the 2cm fold.
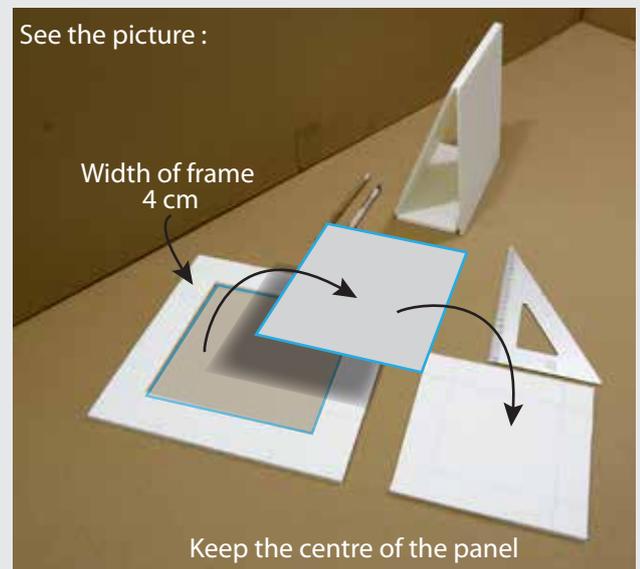

Fold back the rear support as shown and stick to the Sellotape to complete the frame base.

② Now we will cut out the frame itself.
Draw and then cut out a square in the centre.
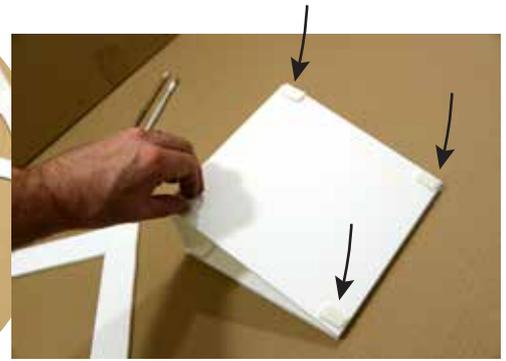

25cm

25cm

4cm

See the picture :

Width of frame 4 cm

Keep the inside to make Frame C.

Keep the centre of the panel

3 Cut out small narrow sections of Velcro that are not wider than the frame. Stick them onto the base.
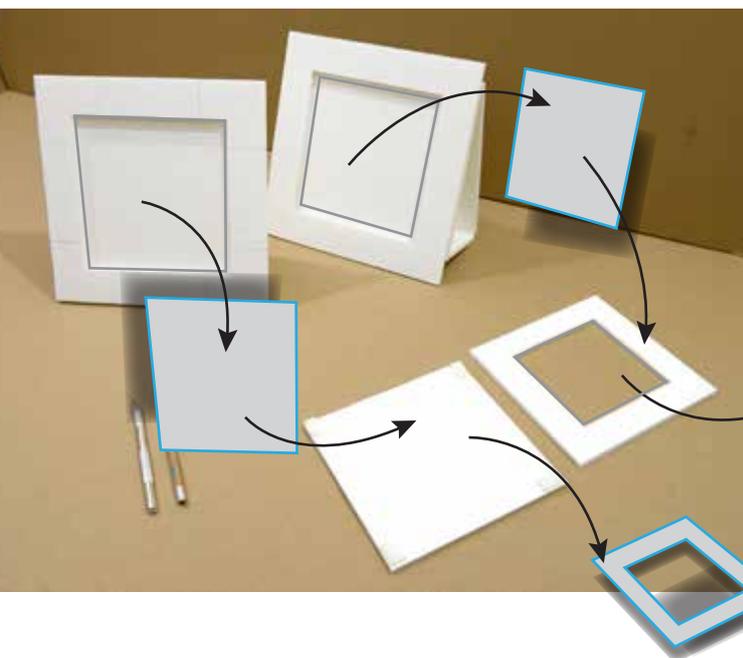

4 Stick the base carefully in the centre of the frame.

Do exactly the same for frame B.

5 Use the centres of Frames A and B to make the smaller Frame C. Repeat each step from Frame A, in the smaller size for Frame C

Now you just have to cut out your photos and stick them in the frame.

Make the base of Frame C from the cut-out centre. Use the rest of the panel to make the frame.

6 Decorate the frames with Washi tape or decoupage paper or paint your own designs
